Summary:

Corrects problem on some systems where Greek characters don't show up in Origin.

Description:

In some versions of Origin, on systems with a large number of Fonts, Greek characters may not display correctly. This Font uses the fact that Fonts are alphabetically sorted to insert itself early in the Font list.

In Windows, go to your Fonts Folder (Start : Settings : Control Panel) and Add the Font to your system.

In Origin, go to Tools : Options and click on the Text Fonts Tab. In the Text Tool section, select ASymbol as your Greek Font.

Extremely useful. I fought quite some time trying to figure out how to make the greek characters reappear before finding this solution.

Rated by: **Vilmos** Date: (7/22/2005 11:56:44 AM)

Very good solution... it took me a while to find it.

Rated by: **Diabolarius** Date: (6/15/2005 4:35:01 AM)

Easy but extremely useful if you dont want to delete as many fonts till the f*** symbol font is loaded.
