

重庆大学材料学院研究生复试

英语口语经验介绍

本人参加了 2014 年重庆大学材料学院材控方向的研究生复试，介绍一下重庆大学英语口语的复试经验。 材控方向面试是分为三个小组， 你在哪个小组面试里是随机分配的。 当然每个小组面试是有差异的， 有的小组复试进行的很快有的很慢， 打分高低也有差异。 这个你只能听天由命了。英语口语面试时老师数量在七八名左右。开始先用英文进行自我介绍。

英文自我介绍切记太长也切记太短， 争取语速正常的情况下， 三分钟左右读完即可。 一般三四百字左右。英文自我介绍包括自己情况、自己本科院校、自己的获奖的情况、自己的爱好以及本科的毕业设计都可以谈。 英文的自我介绍还是很重要的， 因为接下来老师会从你的英文自我介绍里找问题来问你， 而且专业课的很多问题老师也是从你的英文自我介绍里出题。所以一定要好好准备， 不要敷衍了事。 我复试的时候在英语自我介绍里说自己喜欢足球， 结果老师用英语问了我三个问题。 1、 which team do you like best,why ?2.what do you think Chinese national football team? 3. Do you think Chinese national football team can participate the World Cup?。下面是重大老师常问的问题以及模板。

1.英文自我介绍

Good Morning, dear professors

I feel so glad to meet all of you here. Now allow me to introduce myself. My name is Lin Fan. 23 years old. I come from Ningbo, a beautiful coastal city. I graduated from Ningbo Science and Technology University in July ,2014. I majored in materials forming and control engineering.

I took the train ,covering 2200 kilometers, spending 34 hours ,eventually to Chongqing, so you can see/observe that how much desirable I am for being postgraduate. In Chinese traditional culture , “Chongqing ” means good things come in pairs .Similarly I also wish the lucky goddess could favor me. Generally speaking, I am a hard working student when I began to do my graduation thesis , because of not familiar with the research area, I look up for abundant relative theses and data, finally completeing a brilliant thesis.

Futhermore, I am enthusiastic and vigorous. when I was sophomore, I took part in 5 kilometers race at school sports meeting. Although the result was not satisfactory, I have courage and passion to challenge myself.

Well, in my spare time ,I like football. In my opinion, not only football strengthen my body and bring me pleasure, but also it teaches me how to cooperate with others.

Ok, that is all. Thank you for you attention.

2.为什么选择重庆大学材料学院

At first Chongqing University is a prestigious comprehensive national university situated in Chongqing municipality. It is a member of the project 211 and project 985 which aim to transform Chinese universities into better research institutions. Well, the material science and engineering college has strong scientific research strength, owning the national engineering research center for magnesium alloy. Moreover material science speciality and ferrous metallurgy speciality was honored to be state-level key discipline.

According above those reasons I choose Chongqing University as the ideal place to pursue further study.

3.谈谈你为什么打算进一步深造

There are several reasons

First of all, I like my major. Materials shaping and control technology plays an important part in modern industrial production. It can effectively promote product quality, decrease labor cost and greatly improve efficiency. I am fascinated by the great master profound and warm style as well. But I am not easily satisfied with such superficial knowledge. I want to enrich my professional knowledge. This a very important reason for me to do further study.

Next, I love youthful spirit in the university and deeply attracted by the scholar atmosphere. Most important it is great honor to open ear to your teaching.

Finally, I want to be a material processing engineer. In order to realize my dream I think the postgraduate study can make me competent in future job.

That is my simple and clear reason why I go to further study.

4.你的研究生规划

First, I want to cultivate scientific thinking mode so that it can improve my ability of solving problem.

Second, I would like to deepen understanding about professional knowledge and enforce experimental skill.

In the end, I wish that I can make a certain achievement which is beneficial to society.

5.介绍下你本科的学校

I graduated from Qingdao Science and Technology University situated in Qingdao, a beautiful coastal city. Qingdao Science and Technology University is a key university of Shandong Province, short of QUST. QUST is multi-disciplinary university which focus on engineering, management, medicine and law. QUST distinguishes itself by material science, chemical engineering, applied chemistry, mechanical engineering. It has one national engineering center, a state key laboratory, and three key laboratory of education ministry. QUST is honored to be Huangpu military academy of rubber field.

6.本科毕业设计的英文题目

这就因人而异了，在此不再赘述。

在用英语回答老师的问题时，不必非要使用长句和复杂句式。用简单短句让老师能听懂就好。回答问题，要注意逻辑性，保持语句的流利。其实有时老师也挺不懂你在说什么，只要你流利的用英语说完，就是高分，千万不要老是停顿。
